

PSY355

Psychology of Learning and Resilience

A short, friendly map to your course
companion site, what it is, where everything
lives, and how to make it work for you.

YOUR COURSE SITE

PSY355 Companion Website

This instructor-created companion website supports weekly learning in PSY355. Open it from Blackboard or use <https://rpeart73.github.io/psy355/>.

Your companion site, not another inbox

This instructor-created companion website supports a blended synchronous PSY355 course. Weeks 1 to 5, 7 to 9, 11 and 12 meet live. Weeks 6 and 10 are independent asynchronous learning. Weeks 13 and 14 have no lecture; the usual class window becomes office hours for completion, feedback, questions, and course closure. Study Week runs Monday to Friday, October 26 to 30, with no class and no new module. Seneca red marks due dates, a dark-red diamond marks assessment availability or the start of a recurring assessment, black marks live classes, neutral grey marks asynchronous weeks, and a light grey outline marks Study Week. Blackboard remains the official Seneca course platform for announcements, assignment submission, grades, discussions, course records, and required administrative functions.

What it is

- Your weekly learning pathway, in working order
- Every reading, concept, and self-check in one spot
- A companion that sits beside Blackboard

What it is not

- Not a replacement for Blackboard
- Not where announcements, submissions, discussions, grades, or course records live
- Not a place that collects student submissions or stores grades

How to use this page, on every page

At the top of every page on the site sits a bar labelled How to use this page. Open it for step-by-step instructions written for that exact page: what to click, what may use browser storage, what is never graded, and where to go next. Written guidance is available on every covered page. A silent captioned video tour appears only when a current tour is available for that page; otherwise the panel says Video tour coming soon. If a page ever feels unfamiliar, that bar is the fastest way to teach yourself.

PRIVACY, ACCESSIBILITY, AND COPYRIGHT

Use it alongside Blackboard

This site does not require an account, collect student submissions, or store grades. Its own code does not transmit the optional first name, notes, or check answers. When browser storage is available, those items may remain in this browser until you clear them, but browser settings, private browsing, or clearing site data can remove them. Treat them as temporary and export anything you need to keep. Opening an external link or media item contacts that service, which applies its own privacy practices.

Course readings and media are linked for educational use. Copyright remains with the original creators and publishers. Students should access readings through the provided links, Seneca library access, or Blackboard where applicable. Students who experience barriers using the site should use Blackboard and contact the instructor so access can be supported.

START HERE

Open How This Site Works first

It is the first item in the course menu because it explains what this companion site does, what still belongs in Blackboard, what may use temporary browser storage, and how to clear locally stored work on a shared device.

After that short orientation, open Home for the weekly journey. The instructional manuals stay in Site Support whenever you need more detail.

The menu is the map

How This Site Works comes first, before Home, so students meet the site boundaries, privacy controls, accessibility supports, and reset option before beginning the course journey. The rest of the menu is grouped by the work students are trying to do. Home and Calendar orient the term; Weekly Experiences and other immersive spaces hold the teaching environments; source tools support evidence work; assignment and career tools support application; and Site Support keeps the instructional manuals and Report a Problem control.

The course as a journey

Home lays the course out week by week. Each station shows the week's title and its **guiding question**, the one question worth carrying through everything you read that week.

- 1 Click any week station to open that week's page.
- 2 Coming back later? If this browser's local storage is available and has not been cleared, the site may offer to pick up where you left off. Treat that resume point as a convenience, not a backup.

The screenshot shows the Seneca PSY355 Companion website. The header includes the Seneca Polytechnic logo, the course title 'PSY355 Companion', a search bar labeled 'Reading Lens', a 'Listen' button, and navigation links for 'SYNCHRONOUS', 'LIVE ONLINE CLASSES', 'OLB', 'THU 2:00-3:00', and 'FALL 2026'. A left sidebar titled 'ORIENT' contains links for 'How This Site Works', 'Home' (selected), 'Course Rhythm', and 'Calendar and Due Dates'. The main content area features a dropdown menu for 'See this course through your program:' set to 'General stream / no program'. Below this is a 'COMING UP' section with 'Open calendar' and two live class events: 'Live class (September 10): Week 1 live class Course orientation and shared start' and 'Live class (September 17): Week 2 live class'. A red 'Pause' button is also visible. A 'How to use this page' section with a question mark icon and the text 'How to use your home page' has an 'Open' button. At the bottom of the main area, there is a banner image with the text 'WEEKLY JOURNEY Weeks 1-14'.

HOME · THE COURSE JOURNEY, EACH WEEK WITH ITS GUIDING QUESTION

See the course through your program

PSY355 is about how people learn, build a mindset, and stay resilient, and those ideas look different in every field. Right on Home you can reframe the whole course around your own program of study, so learning, mindset, and resilience show up in the work your field will actually ask of you.

- 1 On Home, find the control that says **See this course through your program**. Pick your program from the dropdown of Seneca programs, grouped by area of study. You can also pick a whole area, or choose **Still exploring**.
- 2 You stay on Home. Nothing navigates away. A short **For your field** panel appears at the top, tying the whole course to your program.
- 3 Each week on the journey gains its own short **For your field** line, and the weeks that matter most to your field are marked **Key for your field**.
- 4 For the deeper write-up, open **Career Choices** from the menu. It gives you three clear sections: program context, how PSY355 connects to that field, and how to use psychology in course work.
- 5 A small chip at the top shows **Viewing as your program**, with a way to change it or turn it off during the current session.

A lens, not a different course

Every student reads the same readings and does the same assessments. The lens only changes how the course is framed for you, it never changes what is required. You can turn it off any time, and the chip at the top of the page is how you do it.

Anatomy of a week

Every week page begins with an always-visible explanation of how that week works. Live weeks include a visible class-recording space; the captioned recording appears after it is processed and posted. Asynchronous weeks explain why there is no lecture and what the independent time is for. Work the remaining sections in order, top to bottom.

Study Guide. Before the Knowledge Check, each teaching week carries a rehearsal space: a quick warm-up from earlier weeks, explain-it-back cards where you put each key concept in your own words and compare with the reading, and a question ladder that works the week's guiding questions from recall to application. Nothing is submitted or graded; your notes may be kept temporarily in your own browser.

Knowledge Check. Every week closes with an optional self-check worth no course marks. Set A and Set B are multiple choice, this week's ideas plus a short review from earlier weeks; Set C is different, with short scenarios, matching, and a written reflection you compare against a model. After you answer, you can say how sure you were, and the summary shows not just what you got right but where a confident answer was actually wrong, the thing most worth fixing. Answers are not submitted or graded and may be kept temporarily in this browser; clear or change any answer and take another set fresh.

- 1 **This week's focus**, the question and learning sequence that organize the week.
- 2 **Overview & How this week works**, read this first; it tells you what to do and in what order.
- 3 **Purpose & Outcomes**, what you should be able to do by the end. Test yourself against these sentences.
- 4 **Guiding Questions**, carry at least one with you into the readings.
- 5 **Key Concepts**, each explained and cited to that week's reading, so you always know where an idea comes from.
- 6 **Readings**, full citation and a button. Open access, Seneca Library, Read on Blackboard, or Revisit from an earlier week.
- 7 **The Experience**, an interactive chapter sequence embedded on the page. Enter it, make choices, inspect the evidence, and use the Arrow keys to move between chapters.
- 8 **Weekly Reflection**, connect the week's ideas to your learning conditions, choices, supports, and recovery, then complete the graded entry in Blackboard.
- 9 **Study Guide and Knowledge Check**, optional self-study rehearsal that helps you notice what landed and what to revisit.
- 10 **You can now**, the week's closing checklist. Tick what you can genuinely do; anything left unticked shows exactly what to revisit. Reset any time.

A WEEK PAGE · EVERYTHING IN WORKING ORDER, TOP TO BOTTOM

Every reading, as a card

The library holds every course reading: what it is, what it argues, what to notice, and how to reach it.

- 1 Search any author, title, or idea.
- 2 Filter to one week with the week strip, or browse by format.
- 3 Click a card for the reading's page: core idea, plain-language abstract, level and length, and where the text lives.
- 4 Press the red button to open the reading. A Source page button appears where a separate source or DOI exists.
- 5 Bookmark a reading to your Saved shelf. It may remain on this device while this browser's local storage is available and has not been cleared.

EVERY SOURCE AS A CARD, SEARCHABLE BY WEEK

A READING PAGE • CORE IDEA, ABSTRACT, AND THE OPEN BUTTON

COMPARE SOURCES

Hold up to three readings side by side

- 1 Open Compare from the menu, or press Compare on any reading page.
- 2 Pick up to three readings. Each becomes a column: week, year, origin, length, level, and core idea.
- 3 With two or more selected, press **Synthesize their relationship**. The site explains how they speak to each other, every idea attributed.
- 4 With three, it takes the pairings one at a time, then asks what only appears when all three are on the table.
- 5 Remove a reading with the × on its column, or Clear all to start over.

EACH PAIRING EXPLAINED, EVERY IDEA ATTRIBUTED

Turn any reading into practice

Choose a reading, choose a lens, and answer. Every answer comes back with a short explanation grounded in the reading itself, so a wrong answer still teaches you something specific.

LENS 01

Thematic

What it is about.

LENS 02

Argument

What it claims, and why.

LENS 03

Context

Where it sits in the field and the course.

GLOSSARY

Never defined out of thin air

- Browse by week (including the closing weeks) or search any term.
- Every definition carries a citation to that week's assigned reading.
- The *Scholars this week* strip introduces the people behind the readings. Click a name to jump to their reading.

CONCEPT FLASHCARDS

Practice, never graded

- Pick a week, or take all weeks together.
- Flip the cards: term on the front, definition and citation on the back.
- Run the short quizzes; each question explains its answer. Answers are not submitted or graded and may be kept temporarily in this browser, so you know what to reread before it matters.

Weekly Experiences hub. Every week's experience also lives in one place. Open it from the menu and choose a week to re-enter it without hunting.

THE BIG PICTURE

Resilience Ecology

The Resilience Ecology screen draws the course's ecological model as rings you can explore: the layers of context around a person, from the closest relationships outward. Click or tab through the rings to see what each layer contributes to resilience, and which reading grounds it. Come back to it whenever a week's reading needs placing.

Reading the journey questions

Each week's guiding question is deliberately answerable both ways when you start, for example: what actually makes someone resilient, their grit or the resources around them? Let the week's readings move your answer. If it has not moved by the end of the week, reread the core ideas in the library.

Index

The alphabetical list.

Make a small, realistic start plan

Open **Starting Your Assignment** to see all six graded pieces from day one. Open any item for its shareable assessment guide, or choose **Assignment Start Lab** for a working session. In the lab, choose the assignment and a realistic work-block length, then add as much personal context as helps: your preferred name, program or field, due date, next work session, exact sticking point, and work already completed.

What it creates. Fixed course rules combine your answers into a personal starting point, course-specific next actions, a success target for the next work session, useful questions, and the right human support routes. The plan also explains why each pathway was selected. No AI is used.

How the lab handles your work. The lab's own code does not upload or submit your name, context, answers, or plan to the instructor. A local copy may remain when browser storage is available, but browser settings, private browsing, or clearing site data can remove it. Print or save the plan as a PDF, or copy it as text.

PSY355 | PSYCHOLOGY OF LEARNING

Assignment start plan for Jordan

Weekly Reflections | Created July 13, 2026 | Planning support only

Program or field: Social Service Worker | Blackboard due date you recorded: October 8 at 11:59 p.m.

What you are working toward

Build 11 connected Blackboard entries from your previous record, one course moment, and one honest practice observation.

Your starting idea or question: I want to use the Week 3 case but keep the claim narrow.

Your starting point

- Assignment: Weekly Reflections
- Program or field context: Social Service Worker
- Due date and time copied from Blackboard: October 8 at 11:59 p.m.
- Planned work session: Tuesday at 7 p.m. in the library
- What feels difficult: I do not know what sources or evidence to use. I am stuck on the first sentence or paragraph.
- Your exact description of the sticking point: I have a topic, but I cannot tell which source should anchor my first paragraph.
- What you marked ready: I have the official Blackboard brief open. I have relevant course notes or weekly work. I wrote down the exact due date and time.
- What you have already done or collected: I opened the brief, reviewed Week 3 notes, and saved one possible case.

Your next actions

A PERSONAL PLAN • READY TO PRINT OR SAVE AS PDF

Blackboard remains official. Always return there for the complete brief, rubric, due date, submission link, and recorded grade. The lab helps you begin; it does not write the assignment or replace the instructor's requirements.

A rhythm that works

STEP 1

Open the week page and choose one guiding question to carry into class.

STEP 2

Do the readings with one guiding question in hand.

STEP 3

On a live week, test the ideas in class. On an asynchronous week, use the independent prompt on the week page.

STEP 4

Complete and submit the Weekly Reflection in Blackboard while the week's learning is still clear in your mind.

STEP 5

Use the optional Knowledge Check if helpful, then save your notes and revisit anything still unclear.

Weekly Reflections are graded work worth 10 percent. Entries run from Weeks 2 to 12, beginning the week of September 14; the thread closes December 4, and the best 10 of 11 entries count. Each entry uses one specific weekly learning or participation moment, whether the week is live or asynchronous, and one honest observation about your own practice. Connect each entry to your previous record and explain what changed. The reflection field on the companion site is optional drafting space, not the Blackboard submission.

All six assessment guides are visible on this site from September 8: Weekly Reflections (10 percent, closes December 4), Mindset Evidence Check 1 (20 percent, due October 9), Mid-course Practice Synthesis (10 percent, due October 23), Self-Regulated Learning Case Redesign (20 percent, due November 6), Mindset Evidence Check 2 (20 percent, due November 27), and Personal Resilience Plan (20 percent, due December 11). Site visibility does not mean every Blackboard submission area is open. Blackboard holds the official briefs, rubrics, submission status, submissions, and grades.

PRACTICAL NOTES

Good to know

- Works on phones, tablets, and laptops, and is designed for keyboard navigation.
- They do not follow you between devices automatically. Download a saved-work backup if you want to restore them in another browser or on another device.
- Your saved shelf, notes, and check answers use this browser's local storage when it is available. Browser settings, private browsing, or clearing site data can remove them.
- If the site looks stale after an announced update, refresh the page once.

When in doubt, Blackboard wins.

PSY355 companion website. Blackboard remains the official course platform for submissions, grades, announcements, discussions, and course records.

QUICK REFERENCE

Where to go for what

See how readings connect	Compare Sources ▶ pick up to three
Test yourself on a reading	Source Practice ▶ pick a lens
Look up a term	Glossary ▶ search
Drill before an assessment	Concept Flashcards ▶ pick the weeks
Re-enter the week's experience	Weekly Experiences ▶ pick the week
Submit anything / check grades	Blackboard, always

Reading Lens and other study supports

The **Reading Lens** button at the top of every page opens reading supports that apply across the whole site: text size from 75 to 175 percent, comfortable spacing, a high-legibility font, nine page tints (including a blue light filter that warms the whole screen), a reading ruler that follows your pointer (choose its width, pin it in place, and drag it by hand), a large-print magnifier docked at the bottom of the screen, and read-aloud in your choice of the voices on your own device; a Listen button also sits at the top of every page. Inside an experience, use **A minus** and **A plus** in the presentation header to move through 100, 115, 130, 150, 175, and 200 percent. The header's **Reset** control restarts the experience from its beginning; it does not reset the text size. Dense chapters scroll vertically at readable size instead of shrinking their text. When browser storage is available, your choices may remain in this browser until you change them or clear site data; a Reset all supports button returns everything to default.

Experiences have their own **Accessibility** button. Choose Light, Soft grey, Warm, or High contrast; choose 100, 115, 130, 150, 175, or 200 percent text; switch on a high-legibility font or reduced motion; and read the current chapter aloud with a voice and speed from your device. Use the Left and Right Arrow keys to move between chapters and

Escape to close. Focus stays inside the experience while it is open and returns to the button you used when you close it. These choices use the same temporary browser storage.

Calendar and Due Dates. The calendar uses the Seneca brand palette: Seneca red means due date, a dark-red diamond means assessment availability or the start of a recurring assessment, black means live class, neutral grey means asynchronous with no lecture, and a light grey outline means Study Week. Weeks 6 and 10 are independent learning. Weeks 13 and 14 are office-hours weeks with no lecture. All assignments are due by 11:59 p.m. Eastern Time, EDT or EST as applicable, on the date shown. Blackboard remains the official submission record.

Coming up and phone access. The current schedule stays at the top while you move through the site. Pause freezes the message exactly where it is and keeps the text visible. Select the persistent Coming Up banner to open Calendar and Due Dates; no dialog opens automatically. On a phone, Calendar and Due Dates offers a live calendar subscription. How This Site Works gives you the same site link to share or copy to another device. Blackboard remains the official source if a date changes.

Your saved work. Notes and check answers are kept in this browser's local storage when it is available; the site does not submit them. Browser settings, private browsing, clearing site data, or switching browsers or devices can remove them, so treat work kept in the site as temporary. To keep a copy, use **Generate Your Weekly Notes** or download a saved-work backup from How This Site Works. On a shared or lab computer, use **Clear my saved work** when you finish.

Week pages start folded. Each week opens as a clean map of headings. Press the button beside any heading to open just that section, up to two sections stay open at once (opening a third folds the earliest), and you can fold any section back down when you finish it. Sections fold again when you leave the week, so every visit starts from the clean map, and jumping to a section from the side list opens it for you.

Your study compass. The home page opens with a small panel that reads activity kept in this browser (weeks opened, checks tried, reflections written) and offers up to three next steps. It uses a few fixed rules, not AI, and the companion's own code does not transmit those activity records. You can add your first name so the site greets you; the site does not transmit that name, browser storage can clear it, and **Clear my saved work** removes it along with everything else.

Reading Rescue. Inside each week's Readings section, Reading Rescue is the shortest honest path back in if you fall behind: one anchor reading, one concept to carry, and one evidence question. It is a way back into the readings, never a replacement for them.

If something breaks. Weekly Experiences open in a full-screen layer, so the course menu is temporarily covered. Close the experience to return to the page and menu where you started. If an image, recording, or video will not load, or anything looks wrong, use Report a problem on How This Site Works. It opens an email to the instructor with the page details filled in. No phone number is shown. If the site is unavailable, everything required for the course is also on Blackboard.

Privacy. No third-party content loads automatically. A third-party service is contacted only when you choose to open an external link or load external media. YouTube uses its privacy-enhanced player, and each external service applies its own privacy practices.
