

PSY355

Psychology of Learning and Resilience

A short, friendly map to your course
companion site, what it is, where everything
lives, and how to make it work for you.

YOUR COURSE SITE

PSY355 Companion Website

This instructor-created companion website supports weekly learning in PSY355. Open it from Blackboard or use the public address in this guide.

Your companion site, not another inbox

This instructor-created companion website supports a blended synchronous PSY355 course. Weeks 1 to 3, 5 to 10, and 12 meet live. Weeks 4 and 11 are independent asynchronous learning. Weeks 13 and 14 have no lecture; the usual class window becomes office hours for completion, feedback, questions, and course closure. Study Week runs Monday to Friday, October 26 to 30, with no class and no new module. Red marks due dates, navy marks live classes, amber marks asynchronous weeks, and blue-grey marks Study Week. Blackboard remains the official Seneca course platform for announcements, assignment submission, grades, discussions, course records, and required administrative functions.

What it is

- Your weekly learning pathway, in working order
- Every reading, concept, and self-check in one spot
- A companion that sits beside Blackboard

What it is not

- Not a replacement for Blackboard
- Not where announcements, submissions, discussions, grades, or course records live
- Not a place that collects student submissions or stores grades

How to use this page, on every page

At the top of every page on the site sits a bar labelled How to use this page. Open it for step-by-step instructions written for that exact page: what to click, what saves on your device, what is never graded, and where to go next. Each panel also carries Watch the video tour, a short silent captioned tour that shows the page in motion. If a page ever feels unfamiliar, that bar is the fastest way to teach yourself.

PRIVACY, ACCESSIBILITY, AND COPYRIGHT

Use it alongside Blackboard

This site does not require an account, does not collect student submissions, does not store grades, and does not send personal student information to the instructor, Seneca, or any server. The optional first name, notes, and check answers stay in this browser unless you remove or export them. External media players may be subject to the privacy practices of the host platform.

Course readings and media are linked for educational use. Copyright remains with the original creators and publishers. Students should access readings through the provided links, Seneca library access, or Blackboard where applicable. Students who experience barriers using the site should use Blackboard and contact the instructor so access can be supported.

START HERE

Open How This Site Works first

It is the first item in the course menu because it explains what this companion site does, what still belongs in Blackboard, what saves only in your browser, and how to clear saved work on a shared device.

After that short orientation, open Home for the weekly journey. The instructional manuals stay in Site Support whenever you need more detail.

The menu is the map

How This Site Works comes first, before Home, so students meet the site boundaries, privacy controls, accessibility supports, and reset option before beginning the course journey. The rest of the menu is grouped by the work students are trying to do. Home and Calendar orient the term; Weekly Experiences and other immersive spaces hold the teaching environments; source tools support evidence work; assignment and career tools support application; and Site Support keeps the instructional manuals and Report a Problem control.

PSY355 Companion, navigation	
How This Site Works Start here: purpose, Blackboard boundaries, privacy, accessibility, saved work, and reset controls	
Home The course journey, week by week	Readings and Media Every assigned source, as a card

The course as a journey

Home lays the course out week by week. Each station shows the week's title and its **guiding question**, the one question worth carrying through everything you read that week.

- 1 Click any week station to open that week's page.
- 2 Coming back later? The site remembers where you were on this device and offers to pick up where you left off.

HOME · THE COURSE JOURNEY, EACH WEEK WITH ITS GUIDING QUESTION

See the course through your program

PSY355 is about how people learn, build a mindset, and stay resilient, and those ideas look different in every field. Right on Home you can reframe the whole course around your own program of study, so learning, mindset, and resilience show up in the work your field will actually ask of you.

- 1 On Home, find the control that says **See this course through your program**. Pick your program from the dropdown of Seneca programs, grouped by area of study. You can also pick a whole area, or choose **Still exploring**.
- 2 You stay on Home. Nothing navigates away. A short **For your field** panel appears at the top, tying the whole course to your program.
- 3 Each week on the journey gains its own short **For your field** line, and the weeks that matter most to your field are marked **Key for your field**.
- 4 For the deeper write-up, open **Career Choices** from the menu. It gives you three clear sections: program context, how PSY355 connects to that field, and how to use psychology in course work.
- 5 A small chip at the top shows **Viewing as your program**, with a way to change it or turn it off during the current session.

A lens, not a different course

Every student reads the same readings and does the same assessments. The lens only changes how the course is framed for you, it never changes what is required. You can turn it off any time, and the chip at the top of the page is how you do it.

Anatomy of a week

Every week page begins with an always-visible explanation of how that week works. Live weeks include a visible class-recording space; the captioned recording appears after it is processed and posted. Asynchronous weeks explain why there is no lecture and what the independent time is for. Work the remaining sections in order, top to bottom.

Study Guide. Before the Knowledge Check, each teaching week carries a rehearsal space: a quick warm-up from earlier weeks, explain-it-back cards where you put each key concept in your own words and compare with the reading, and a question ladder that works the week's guiding questions from recall to application. Nothing is recorded or graded; your notes stay in your own browser.

Knowledge Check. Every week closes with an optional, never scored self-check. Set A and Set B are multiple choice, this week's ideas plus a short review from earlier weeks; Set C is different, with short scenarios, matching, and a written reflection you compare against a model. After you answer, you can say how sure you were, and the summary shows not just what you got right but where a confident answer was actually wrong, the thing most worth fixing. Nothing is recorded; clear or change any answer and take another set fresh.

- 1 **This week's focus**, the question and learning sequence that organize the week.
- 2 **Overview & How this week works**, read this first; it tells you what to do and in what order.
- 3 **Purpose & Outcomes**, what you should be able to do by the end. Test yourself against these sentences.
- 4 **Guiding Questions**, carry at least one with you into the readings.
- 5 **Key Concepts**, each explained and cited to that week's reading, so you always know where an idea comes from.
- 6 **Readings**, full citation and a button. Open access, Seneca Library, Read on Blackboard, or Revisit from an earlier week.
- 7 **The Experience**, an interactive chapter sequence embedded on the page. Enter it, make choices, inspect the evidence, and use the Arrow keys to move between chapters.
- 8 **Weekly Reflection**, connect the week's ideas to your learning conditions, choices, supports, and recovery, then complete the graded entry in Blackboard.
- 9 **Study Guide and Knowledge Check**, optional private rehearsal that helps you notice what landed and what to revisit.
- 10 **You can now**, the week's closing checklist. Tick what you can genuinely do; anything left unticked shows exactly what to revisit. Reset any time.

A WEEK PAGE • EVERYTHING IN WORKING ORDER, TOP TO BOTTOM

Every reading, as a card

The library holds every course reading: what it is, what it argues, what to notice, and how to reach it.

- 1 Search any author, title, or idea.
- 2 Filter to one week with the week strip, or browse by format.
- 3 Click a card for the reading's page: core idea, plain-language abstract, level and length, and where the text lives.
- 4 Press the red button to open the reading. A Source page button appears where a separate source or DOI exists.
- 5 Bookmark a reading to your Saved shelf. It stays on this device so you can return before an assessment.

EVERY SOURCE AS A CARD, SEARCHABLE BY WEEK

A READING PAGE • CORE IDEA, ABSTRACT, AND THE OPEN BUTTON

COMPARE SOURCES

Hold up to three readings side by side

- 1 Open Compare from the menu, or press Compare on any reading page.
- 2 Pick up to three readings. Each becomes a column: week, year, origin, length, and core idea.
- 3 With two or more selected, press **Synthesize their relationship**. The site explains how they speak to each other, every idea attributed.
- 4 With three, it takes the pairings one at a time, then asks what only appears when all three are on the table.
- 5 Remove a reading with the × on its column, or Clear all to start over.

EACH PAIRING EXPLAINED, EVERY IDEA ATTRIBUTED

Turn any reading into practice

Choose a reading, choose a lens, and answer. Every answer comes back with a short explanation grounded in the reading itself, so a wrong answer still teaches you something specific.

LENS 01

Thematic

What it is about.

LENS 02

Argument

What it claims, and why.

LENS 03

Context

Where it sits in the field and the course.

GLOSSARY

Never defined out of thin air

- Browse by week (including the closing weeks) or search any term.
- Every definition carries a citation to that week's assigned reading.
- The *Scholars this week* strip introduces the people behind the readings. Click a name to jump to their reading.

CONCEPT FLASHCARDS

Practice, never scored

- Pick a week, or take all weeks together.
- Flip the cards: term on the front, definition and citation on the back.
- Run the short quizzes; each question explains its answer. Nothing is recorded, it exists so you know what to reread before it matters.

Weekly Experiences hub. Every week's experience also lives in one place. Open it from the menu and choose a week to re-enter it without hunting.

THE BIG PICTURE

Resilience Ecology

The Resilience Ecology screen draws the course's ecological model as rings you can explore: the layers of context around a person, from the closest relationships outward. Click or tab through the rings to see what each layer contributes to resilience, and which reading grounds it. Come back to it whenever a week's reading needs placing.

Reading the journey questions

Each week's guiding question is deliberately answerable both ways when you start, for example: what actually makes someone resilient, their grit or the resources around them? Let the week's readings move your answer. If it has not moved by the end of the week, reread the core ideas in the library.

THREE MORE WAYS INTO THE LIBRARY

Browse it however you think

By week

Everything, week by week.

Tiles

The whole library as a wall you can scan.

Index

The alphabetical list.

Make a small, realistic start plan

Open **Starting Your Assignment**, then choose **Assignment Start Lab**. Choose the assignment and a realistic work-block length, then add as much personal context as helps: your preferred name, program or field, due date, next work session, exact sticking point, and work already completed.

What it creates. Fixed course rules combine your answers into a personal starting point, course-specific next actions, a success target for the next work session, useful questions, and the right human support routes. The plan also explains why each pathway was selected. No AI is used.

What stays private. Your name, context, answers, and plan stay in this browser on this device. Nothing is uploaded, submitted, graded, or sent to the instructor. Print or save the plan as a PDF, or copy it as text.

PSY355 | PSYCHOLOGY OF LEARNING

Assignment start plan for Jordan

Weekly Reflections | Created July 13, 2026 | Planning support only

Program or field: Social Service Worker | Blackboard due date you recorded: October 8 at 11:59 p.m.

What you are working toward

Build 11 connected Blackboard entries from your previous record, one course moment, and one honest practice observation.

Your starting idea or question: I want to use the Week 3 case but keep the claim narrow.

Your starting point

- Assignment: Weekly Reflections
- Program or field context: Social Service Worker
- Due date and time copied from Blackboard: October 8 at 11:59 p.m.
- Planned work session: Tuesday at 7 p.m. in the library
- What feels difficult: I do not know what sources or evidence to use. I am stuck on the first sentence or paragraph.
- Your exact description of the sticking point: I have a topic, but I cannot tell which source should anchor my first paragraph.
- What you marked ready: I have the official Blackboard brief open. I have relevant course notes or weekly work. I wrote down the exact due date and time.
- What you have already done or collected: I opened the brief, reviewed Week 3 notes, and saved one possible case.

Your next actions

A PRIVATE PLAN · READY TO PRINT OR SAVE AS PDF

Blackboard remains official. Always return there for the complete brief, rubric, due date, submission link, and recorded grade. The lab helps you begin; it does not write the assignment or replace the instructor's requirements.

A rhythm that works

STEP 1

Open the week page and choose one guiding question to carry into class.

STEP 2

Do the readings with one guiding question in hand.

STEP 3

On a live week, test the ideas in class. On an asynchronous week, use the independent prompt on the week page.

STEP 4

Complete the Weekly Reflection while the class discussion or independent work is still clear in your mind.

STEP 5

Use the private Knowledge Check if helpful, then save your notes and revisit anything still unclear.

Weekly Reflections run from Weeks 2 to 12, and the best 10 of 11 count. Each entry uses one live class moment and an honest observation about your practice. In Week 2, quote one line from your Week 1 landing impressions or clearly state that this is your first entry. After that, quote one line from your previous reflection and explain what changed. Before another assessment, use **Compare** on the readings you plan to write about, and run **Concept Flashcards** if it helps.

The six graded pieces are Weekly Reflections (10 percent), a Mid-course Practice Synthesis (10 percent), Mindset Evidence Check 1 (20 percent), Self-Regulated Learning Case Redesign (20 percent), Mindset Evidence Check 2 (20 percent), and the Personal Resilience Plan final project (20 percent). Blackboard holds the full instructions, submissions, and grades.

PRACTICAL NOTES

Good to know

- Works on phones, tablets, and laptops, and is designed for keyboard navigation.
- Your saved shelf, notes, and check answers live only in your own browser, on your own device.
- Clearing browser data clears them, and they do not follow you between devices.
- If the site looks stale after an announced update, refresh the page once.

THE ONE RULE THAT MATTERS

When in doubt, Blackboard wins.

PSY355 companion website. Blackboard remains the official course platform for submissions, grades, announcements, discussions, and course records.

Where to go for what

Start this week's work	Home ► click the week ► work top to bottom
Find a reading fast	Readings and Media ► search or week strip
See how readings connect	Compare Sources ► pick up to three
Test yourself on a reading	Source Practice ► pick a lens
Look up a term	Glossary ► search
Drill before an assessment	Concept Flashcards ► pick the weeks
Re-enter the week's experience	Weekly Experiences ► pick the week
Submit anything / check grades	Blackboard, always

Reading Lens and other study supports

The **Reading Lens** button at the top of every page opens reading supports that apply across the whole site: text size from 75 to 175 percent, comfortable spacing, a high-legibility font, nine page tints (including a blue light filter that warms the whole screen), a reading ruler that follows your pointer (choose its width, pin it in place, and drag it by hand), a large-print magnifier docked at the bottom of the screen, and read-aloud in your choice of the voices on your own device; a Listen button also sits at the top of every page. Inside an experience, use the separate **A minus**, **A plus**, and **Reset** controls to set experience text from 100 to 200 percent. Dense chapters scroll vertically at readable size instead of shrinking their text. Your choices save only in your browser, stay on until you change them, and a Reset all supports button returns everything to default.

Experiences have their own **Accessibility** button. Choose Dark, Light, Soft grey, Warm, or High contrast; set the experience text to 100, 115, 130, or 150 percent; switch on a high-legibility font or reduced motion; and read the current chapter aloud with a voice and speed from your device. Use the Left and Right Arrow keys to move between chapters and Escape to close. Focus stays inside the experience while it is open and returns to the button you used when you close it. These choices also stay only in this browser.

Calendar and Due Dates. The calendar uses the Seneca brand palette: Seneca red means due date, black means live class, neutral grey means asynchronous with no lecture, and a light grey outline means Study Week. Weeks 4 and 11 are independent learning. Weeks 13 and 14 are office-hours weeks with no lecture. All assignments are due by 11:59 p.m. Eastern Time, EDT or EST as applicable, on the date shown. Blackboard remains the official submission record.

Coming up and phone access. The current schedule stays at the top while you move through the site. Pause freezes the message exactly where it is and keeps the text visible. The first visit in a browser also opens a short reminder. On a phone, Calendar and Due Dates offers a live calendar subscription. How This Site Works

gives you the same site link to share or copy to another device. Blackboard remains the official source if a date changes.

Your saved work. Notes and check answers save automatically in this browser on this device and are never submitted. They will be here when you come back in the same browser. To keep a permanent copy anywhere, use **Generate Your Weekly Notes** at the end of any week. On a shared or lab computer, the How This Site Works page has a one-click **Clear my saved work** control.

Week pages start folded. Each week opens as a clean map of headings. Press the button beside any heading to open just that section, up to two sections stay open at once (opening a third folds the earliest), and you can fold any section back down when you finish it. Sections fold again when you leave the week, so every visit starts from the clean map, and jumping to a section from the side list opens it for you.

Your study compass. The home page opens with a small panel that reads only what you have already done on this device (weeks opened, checks tried, reflections written) and offers up to three next steps. It uses a few fixed rules, not AI, and nothing about you leaves your browser. You can add your first name so the site greets you; the name stays in this browser only, is never sent anywhere, and Clear my saved work removes it along with everything else.

Reading Rescue. Inside each week's Readings section, Reading Rescue is the shortest honest path back in if you fall behind: one anchor reading, one concept to carry, and one evidence question. It is a way back into the readings, never a replacement for them.

If something breaks. Weekly Experiences open inside the site with the menu still beside you. If an image, recording, or video will not load, or anything looks wrong, use Report a problem on How This Site Works. It opens an email to the instructor with the page details filled in. No phone number is shown. If the site is unavailable, everything required for the course is also on Blackboard.

Privacy. Nothing on this site contacts an external service until you choose to load or play a video; when you do, YouTube's privacy-enhanced player applies its own practices inside its frame.
