

PSY355

Psychology of Learning and Resilience

A short, friendly map to your course companion site, what it is, where everything lives, and how to make it work for you.

YOUR COURSE SITE

PSY355 Companion Website

This instructor-created companion website supports weekly learning in PSY355. Open it from Blackboard or use the public address in this guide.

START HERE

Your companion site, not another inbox

This instructor-created companion website supports weekly learning in PSY355. It gathers weekly learning pathways, assigned readings, key concepts, walkthroughs, and study supports in one place. Blackboard remains the official Seneca course platform for announcements, assignment submission, grades, discussions, course records, and required administrative functions.

What it is

- Your weekly learning pathway, in working order
- Every reading, concept, and self-check in one spot
- A companion that sits beside Blackboard

What it is not

- Not a replacement for Blackboard
- Not where announcements, submissions, discussions, grades, or course records live
- Not a place that collects student submissions or stores grades

Use it alongside Blackboard

This site does not require an account, does not collect student submissions, does not store grades, and does not send personal student information to the instructor, Seneca, or any server. The optional first name, notes, and check answers stay in this browser unless you remove or export them. External media players may be subject to the privacy practices of the host platform.

Course readings and media are linked for educational use. Copyright remains with the original creators and publishers. Students should access readings through the provided links, Seneca library access, or Blackboard where applicable. Students who experience barriers using the site should use Blackboard and contact the instructor so access can be supported.

THE WHOLE SITE, AT A GLANCE

The menu is the map

The left-hand menu is the entire site. Here is every door and where it leads.

PSY355 Companion, navigation	
 Home The course journey, week by week	 Library of Readings Every assigned source, as a card
 Compare Reading Concepts Hold up to three readings side by side	 Build Your Reading Comprehension Turn any reading into practice questions
 Glossary & Thinkers Every key term, and the scholars behind it	 Self-check Flip cards & short quizzes, never scored
 Weekly Walkthroughs Teaching Weeks 2 to 12, with display and narration controls	 By week · Tiles · Index Three more ways into the same library

The course as a journey

Home lays the course out week by week. Each station shows the week's title and its **guiding question**, the one question worth carrying through everything you read that week.

- 1 Click any week station to open that week's page.
- 2 Coming back later? The site remembers where you were on this device and offers to pick up where you left off.

HOME · THE COURSE JOURNEY, EACH WEEK WITH ITS GUIDING QUESTION

See the course through your program

PSY355 is about how people learn, build a mindset, and stay resilient, and those ideas look different in every field. Right on Home you can reframe the whole course around your own program of study, so learning, mindset, and resilience show up in the work your field will actually ask of you.

- 1 On Home, find the control that says **See this course through your program**. Pick your program from the dropdown of Seneca programs, grouped by area of study. You can also pick a whole area, or choose **Still exploring**.
- 2 You stay on Home. Nothing navigates away. A short **For your field** panel appears at the top, tying the whole course to your program.
- 3 Each week on the journey gains its own short **For your field** line, and the weeks that matter most to your field are marked **Key for your field**.
- 4 For the deeper write-up, open **Career Choices** from the menu. It gives you three clear sections: program context, how PSY355 connects to that field, and how to use psychology in course work.
- 5 A small chip at the top shows **Viewing as your program**, with a way to change it or turn it off during the current session.

A lens, not a different course

Every student reads the same readings and does the same assessments. The lens only changes how the course is framed for you, it never changes what is required. You can turn it off any time, and the chip at the top of the page is how you do it.

Anatomy of a week

Every week page runs in the order the week is meant to run. Work it top to bottom.

Study Guide. Before the Knowledge Check, each teaching week carries a rehearsal space: a quick warm-up from earlier weeks, explain-it-back cards where you put each key concept in your own words and compare with the reading, and a question ladder that works the week's guiding questions from recall to application. Nothing is recorded or graded; your notes stay in your own browser.

Knowledge Check. Every week closes with an optional, never scored self-check. Set A and Set B are multiple choice, this week's ideas plus a short review from earlier weeks; Set C is different, with short scenarios, matching, and a written reflection you compare against a model. After you answer, you can say how sure you were, and the summary shows not just what you got right but where a confident answer was actually wrong, the thing most worth fixing. Nothing is recorded; clear or change any answer and take another set fresh.

- 1 **This week's focus**, the question and learning sequence that organize the week.
- 2 **Overview & How this week works**, read this first; it tells you what to do and in what order.
- 3 **Purpose & Outcomes**, what you should be able to do by the end. Test yourself against these sentences.
- 4 **Guiding Questions**, carry at least one with you into the readings.
- 5 **Key Concepts**, each explained and cited to that week's reading, so you always know where an idea comes from.
- 6 **Readings**, full citation and a button. Open access, Seneca Library, Read on Blackboard, or Revisit from an earlier week.
- 7 **The Walkthrough**, a slide deck embedded on the page. Arrow keys move through it, or open it fullscreen.
- 8 **Weekly Reflection**, connect the week's ideas to your learning conditions, choices, supports, and recovery, then complete the graded entry in Blackboard.
- 9 **Study Guide and Knowledge Check**, optional private rehearsal that helps you notice what landed and what to revisit.
- 10 **You can now**, the week's closing checklist. Tick what you can genuinely do; anything left unticked shows exactly what to revisit. Reset any time.

A WEEK PAGE · EVERYTHING IN WORKING ORDER, TOP TO BOTTOM

Every reading, as a card

The library holds every course reading: what it is, what it argues, what to notice, and how to reach it.

- 1 Search any author, title, or idea.
- 2 Filter to one week with the week strip, or browse by format.
- 3 Click a card for the reading's page: core idea, plain-language abstract, level and length, and where the text lives.
- 4 Press the red button to open the reading. A Source page button appears where a separate source or DOI exists.
- 5 Bookmark a reading to your Saved shelf. It stays on this device so you can return before an assessment.

EVERY SOURCE AS A CARD, SEARCHABLE BY WEEK

A READING PAGE · CORE IDEA, ABSTRACT, AND THE OPEN BUTTON

COMPARE READING CONCEPTS

Hold up to three readings side by side

- 1 Open Compare from the menu, or press Compare on any reading page.
- 2 Pick up to three readings. Each becomes a column: week, year, origin, length, level, and core idea.
- 3 With two or more selected, press **Synthesize their relationship**. The site explains how they speak to each other, every idea attributed.
- 4 With three, it takes the pairings one at a time, then asks what only appears when all three are on the table.
- 5 Remove a reading with the × on its column, or Clear all to start over.

EACH PAIRING EXPLAINED, EVERY IDEA ATTRIBUTED

Turn any reading into practice

Choose a reading, choose a lens, and answer. Every answer comes back with a short explanation grounded in the reading itself, so a wrong answer still teaches you something specific.

LENS 01

Thematic

What it is about.

LENS 02

Argument

What it claims, and why.

LENS 03

Context

Where it sits in the field and the course.

GLOSSARY & THINKERS

Never defined out of thin air

- Browse by week (including the closing weeks) or search any term.
- Every definition carries a citation to that week's assigned reading.
- The *Scholars this week* strip introduces the people behind the readings. Click a name to jump to their reading.

SELF-CHECK

Practice, never scored

- Pick a week, or take all weeks together.
- Flip the cards: term on the front, definition and citation on the back.
- Run the short quizzes; each question explains its answer. Nothing is recorded, it exists so you know what to reread before it matters.

Weekly Walkthroughs hub. Every week's deck also lives in one place. Open it from the menu and pick the week to rewatch without hunting.

THE BIG PICTURE

Resilience Ecology

The Resilience Ecology screen draws the course's ecological model as rings you can explore: the layers of context around a person, from the closest relationships outward. Click or tab through the rings to see what each layer contributes to resilience, and which reading grounds it. Come back to it whenever a week's reading needs placing.

Reading the journey questions

Each week's guiding question is deliberately answerable both ways when you start, for example: what actually makes someone resilient, their grit or the resources around them? Let the week's readings move your answer. If it has not moved by the end of the week, reread the core ideas in the library.

THREE MORE WAYS INTO THE LIBRARY

Browse it however you think

By week

Everything, week by week.

Tiles

The whole library as a wall you can scan.

Index

The alphabetical list.

A rhythm that works

STEP 1

Open the week page and choose one guiding question to carry into class.

STEP 2

Do the readings with one guiding question in hand.

STEP 3

Skim the walkthrough, then test the ideas through live class discussion.

STEP 4

After class, complete the Weekly Reflection while the discussion is still clear in your mind.

STEP 5

Use the private Knowledge Check if helpful, then save your notes and revisit anything still unclear.

Weekly Reflections run from Weeks 2 to 12, and the best 10 of 11 count. Each entry uses one live class moment and an honest observation about your practice. In Week 2, quote one line from your Week 1 landing impressions or clearly state that this is your first entry. After that, quote one line from your previous reflection and explain what changed. Before another assessment, use **Compare** on the readings you plan to write about, and run **Self-check** if it helps.

The six graded pieces are Weekly Reflections (10 percent), a Mid-course Practice Synthesis (10 percent), Mindset Evidence Check 1 (20 percent), Self-Regulated Learning Case Redesign (20 percent), Mindset Evidence Check 2 (20 percent), and the Personal Resilience Plan final project (20 percent). Blackboard holds the full instructions, submissions, and grades.

PRACTICAL NOTES

Good to know

- Works on phones, tablets, and laptops, and is designed for keyboard navigation.
- Your saved shelf, notes, and check answers live only in your own browser, on your own device.
- Clearing browser data clears them, and they do not follow you between devices.
- If the site looks stale after an announced update, refresh the page once.

THE ONE RULE THAT MATTERS

When in doubt, Blackboard wins.

PSY355 companion website. Blackboard remains the official course platform for submissions, grades, announcements, discussions, and course records.

Where to go for what

Start this week's work	Home ► click the week ► work top to bottom
Find a reading fast	Library of Readings ► search or week strip
See how readings connect	Compare Reading Concepts ► pick up to three
Test yourself on a reading	Build Your Reading Comprehension ► pick a lens
Look up a term	Glossary & Thinkers ► search
Drill before an assessment	Self-check ► pick the weeks
Rewatch the week's deck	Weekly Walkthroughs ► pick the week
Submit anything / check grades	Blackboard, always

Reading Lens and other study supports

The **Reading Lens** button at the top of every page opens reading supports that apply across the whole site: text size from 75 to 175 percent, comfortable spacing, a high-legibility font, nine page tints (including a blue light filter that warms the whole screen), a reading ruler that follows your pointer (choose its width, pin it in place, and drag it by hand), a large-print magnifier docked at the bottom of the screen, and read-aloud in your choice of the voices on your own device; a Listen button also sits at the top of every page. Your choices save only in your browser, stay on until you change them, and a Reset all supports button returns everything to default.

Walkthroughs have their own **Accessibility** button. Choose Dark, Light, Soft grey, Warm, or High contrast; set the walkthrough text to 100, 115, 130, or 150 percent; switch on a high-legibility font or reduced motion; and read the current slide aloud with a voice and speed from your device. Use the Left and Right Arrow keys to move between slides and Escape to close. Focus stays inside the walkthrough while it is open and returns to the button you used when you close it. These choices also stay only in this browser.

Calendar and Due Dates. The left menu now has a Calendar and Due Dates page: every deadline on one page with a month view, plus one-tap phone reminders (subscribe once and every deadline lands in your own calendar app with a two day warning). Week-based deadlines land on your class day; Blackboard confirms the exact time.

Your saved work. Notes and check answers save automatically in this browser on this device and are never submitted. They will be here when you come back in the same browser. To keep a permanent copy anywhere, use **Generate Your Weekly Notes** at the end of any week. On a shared or lab computer, the How This Site Works page has a one-click **Clear my saved work** control.

Week pages start folded. Each week opens as a clean map of headings. Press the button beside any heading to open just that section, up to two sections stay open at once (opening a third folds the earliest), and you can fold any section back down when you finish it. Sections fold again when you leave the week, so every visit starts from the clean map, and jumping to a section from the side list opens it for you.

Your study compass. The home page opens with a small panel that reads only what you have already done on this device (weeks opened, checks tried, reflections written) and offers up to three next steps. It uses a few fixed rules, not AI, and nothing about you leaves your browser. You can add your first name so the site greets you; the name stays in this browser only, is never sent anywhere, and Clear my saved work removes it along with everything else.

Reading Rescue. Inside each week's Readings section, Reading Rescue is the shortest honest path back in if you fall behind: one anchor reading, one concept to carry, and one evidence question. It is a way back into the readings, never a replacement for them.

If something breaks. Weekly Walkthroughs now open inside the site with the menu still beside you, and every image and 3D model can be enlarged. If a video will not load or anything looks wrong, the How This Site Works page has a Report a problem button that emails the instructor with the page details filled in. If the site is ever unavailable, everything required for the course is also on Blackboard.

Privacy. Nothing on this site contacts an external service until you choose to load or play a video; when you do, YouTube's privacy-enhanced player applies its own practices inside its frame.
